

INVESTMENT OBJECTIVE

IAEF is a Cboe-listed ETF designed to provide investors with exposure to a diverse range of 60-80 companies, listed on Indian stock exchanges. The fund harnesses India's growth story, driven by the region's unique demographics, by using an active investment process. It aims to outperform its benchmark, the MSCI India (Net) in AUD, over rolling 5-year periods.

REASONS TO INVEST

GROWTH

India, the world's fastest-growing major economy, offers investors unique opportunities through its corporate ecosystem. By investing in companies within this dynamic environment, investors can benefit from the regions distinct demographic advantages and complement the growth allocation in their portfolio.

DIVERSIFICATION

India's equity market, driven by domestic consumption and services, offers diversification opportunities for global investors, particularly those from commodity-based economies like Australia and New Zealand. Its broad industry representation and currency diversification add to its appeal.

ALPHA

IAEF offers exposure to a broad spectrum of companies, which are not only large and well-established, but also smaller and medium-sized firms experiencing earnings growth that have yet to be "appreciated" by institutional investors. Our strong network in India, including advisory partnerships with some of the top local fund managers, allows us to invest in the earlier stages of a company's growth cycle.

PERFORMANCE

Cboe Code	IAEF
Bloomberg Code	IAEF:AU
APIR	AU0000384380
Distributions	Annual
Management Fee	1.10% p.a.
Performance Fee	10% of excess returns, over and above the MSCI India (Net) in AUD, after fees and Indian Capital Gains Tax.
Inception date	18th March 2025
Index	MSCI India (Net) in AUD

Period	1 month	3 months	6 months	1 year	Since Inception
Active ETF	-11.85%	-21.11%	-17.99%	-23.38%	-14.84%
Index/Benchmark	-11.49%	-20.29%	-16.99%	-21.24%	-13.78%
Outperformance	-0.37%	-0.81%	-1.00%	-2.14%	-1.07%

*Source: India Avenue, MSCI.

Performance is calculated using exit NAV from point to point. Above returns are calculated based on the exit price of 31 March 2026, net of fees and assuming reinvestment of dividends. Returns of longer duration than 1 year are annualised.

Past performance is not an indicator of future performance. Returns shown above do not reflect brokerage or the bid-ask spread that investors incur when buying and selling units on the exchange. Returns are after all management and performance fees and assume reinvestment of any distributions and do not consider tax paid as an investor in the Fund. Returns also include all Indian Capital Gains Tax paid on sale of investments. Australian domiciled investors receive a partial credit for these taxes in their annual tax refund. Over the last 5 years the impact on performance from payment of Indian CGT is approximately 1.0% per annum. We estimate that 50-100% of Indian CGT paid is recoverable in Australian investor tax returns as a tax credit. However, we are not tax advisors and investors should seek their own tax advice. The MSCI India benchmark returns are calculated pre taxes paid.

RISKS OF INVESTING:

Investors should be mindful of market, currency and liquidity issues as potential risks, when investing in a single region. Additionally, each country would have its own unique political, economic, social, environmental and governance risks. Refer to the PDS, which is available on India Avenue's website for more information on risks.
