Press Release

India Avenue ETF Launches: A Gateway to India's Thriving Investment Landscape

SYDNEY – 17 March 2025 – India Avenue Investment Management is proud to announce the launch of its first exchange-traded fund, India Avenue Equity Fund ETF (ticker: IAEF) in Australia scheduled for 18 March 2025. IAEF will provide investors and advisors access to an actively managed portfolio of listed companies in India.

This official launch offers Australian and New Zealand investors the opportunity to tap into the growth potential of one of the world's fastest-growing major economies: India.

The India Avenue Equity Fund Active ETF, to be listed on Cboe Australia, offers investors exposure to a diversified portfolio of Indian equities, focusing on a mix of established companies and emerging businesses across various sectors. Actively managed, the fund aims to adjust its holdings based on market conditions and opportunities within India's evolving economy. While India presents long-term growth potential, investing in emerging markets carries inherent risks, including market volatility and economic fluctuations. IAEF seeks to provide investors with diversified exposure to the Indian equity market while carefully managing these risks.

India's appeal as an investment destination is clear, with a population of 1.4 billion and a median age of just 29, offering a youthful and dynamic demographic that is expected to drive consumption and innovation going forward. Key growth areas such as services, infrastructure development, consumption, and manufacturing are well-positioned to support India's continued economic expansion, making it a promising market for long-term investment.

"We are pleased to introduce the IAEF Active ETF to investors looking for exposure to India's growth potential," said Mugunthan Siva, Co-Founder and Managing Director at India Avenue Investment Management. "As one of the fastest-growing major economies, India presents an attractive investment opportunity. Our ETF offers a straightforward way for investors to access India's evolving sectors, including technology, manufacturing, and infrastructure."

The India Avenue Active ETF offers broad-based exposure to Indian equities, encompassing key sectors such as technology, healthcare and pharmaceuticals, energy, consumer goods, financial services, and more, providing investors with a diversified way to participate in India's growth.

As an efficient investment vehicle, IAEF provides easy access to India's stock market. Drawing on India Avenue's 9-year track record with its actively managed India Avenue Equity Fund, the ETF leverages selective stock picking and local knowledge networks to offer growth opportunities in India's evolving market.

India Avenue has been a key player in capitalising on India's growth for the past nine years, managing two successful unlisted funds. The firm's investment philosophy focuses on India's strong growth potential and its ability to deliver positive returns through an actively managed portfolio, leveraging deep local market knowledge.

"The India Avenue Active ETF marks the next stage of growth for us, as we aim to capture a broader range of investors, including SMSFs, younger cohorts, and long-term investors," added Mugunthan Siva. "Our focus on India's structural transformation, coupled with our local stock-picking skillset, makes this ETF a compelling choice for Australian and New Zealand investors looking to diversify their portfolios and capitalise on the country's vast potential."

Investors are encouraged to consult with their financial advisors to understand how the India Avenue ETF can enhance and diversify their portfolios.

About India Avenue Active ETF: is an exchange-traded fund designed to provide exposure to the Indian equity market through a diversified selection of companies. The Active ETF offers investors an efficient way to participate in India's ongoing economic and corporate transformation.
